SECTION 1

Key Assumptions

Foundation inputs for all projections

1.1 Pricing Assumptions

TIER	MONTHLY PRICE	ANNUAL PRICE (20% DISCOUNT)	TARGET SEGMENT	EXPECTED MIX (Y1)	EXPECTED MIX (Y3)
Starter	£99	£950	1–3 locations, ≤25 staff	40%	25%
Professional	£299	£2,870	4–15 locations, unlimited staff	45%	50%
Enterprise	£749	£7,190	15+ locations, API, SLA	15%	25%
Blended ARPU	£310	£2,976			

1.2 Growth Assumptions

ASSUMPTION	YEAR 1	YEAR 2	YEAR 3
New customers per month (avg)	3	8	15
Monthly churn rate	3.0%	2.0%	1.5%
Annual churn rate	31%	21%	16%
Annual plan adoption	20%	35%	50%
Upgrade rate (Starter→Pro)	10%	15%	20%

1.3 Cost Assumptions

COST CATEGORY	YEAR 1	YEAR 2	YEAR 3
Average engineer salary (fully loaded)	£55,000	£60,000	£65,000
Average non-engineer salary (fully loaded)	£40,000	£42,000	£45,000
Cloud cost per customer/month	£8	£7	£6

AI API cost per customer/month	£5	£4	£3
Email/SMTP cost per customer/month	£1	£1	£1
Stripe fees (% of revenue)	2.9%	2.9%	2.9%

Key principle: All projections are conservative. We use bottom-up customer acquisition (not top-down market share) and assume no NHS revenue in Years 1–2. NHS procurement cycles are 12–24 months.

6.2 Funding Requirements

METRIC	AMOUNT
Cash required to break-even (Month 30)	£542,000
Recommended raise (with buffer)	£600,000
Initial raise (Pulse Angels round)	£200,000–£350,000
Bridge round needed (Month 12–15)	£200,000–£300,000
Total funding needed	£400,000–£650,000

6.3 Runway Analysis

SCENARIO	INITIAL RAISE	MONTHS TO BRIDGE	BRIDGE AMOUNT	MONTHS TO BREAK-EVEN
Base case	£300,000	Month 12	£250,000	Month 30

Optimistic	£300,000	Month 15	£150,000	Month 24
Conservative	£300,000	Month 10	£350,000	Month 36

Funding strategy: Raise £200K–£350K from Pulse Angels (SEIS-eligible). Use to reach 30+ customers and £10K+ MRR. Then raise a bridge round of £200K–£300K from existing investors + new angels at a higher valuation. Break-even at ~170 customers (Month 30).
