

AI-FIRST CARE OPERATING SYSTEM

One platform for UK care operations

The connected care management platform for UK supported-living providers. Rota, medication, notes, compliance — from one system.

41	484	108	152K+
MODULES	API ENDPOINTS	TABLES	POTENTIAL CUSTOMERS

Care managers spend 40% of their day on paperwork, not care

A typical supported-living provider manages operations with:

- Paper MAR charts for medication
- Spreadsheets for rotas and scheduling
- Physical folders for compliance evidence
- Phone calls and WhatsApp for team communication
- Paper forms for incidents and daily notes

"I spend my mornings checking three spreadsheets for the rota, a paper MAR chart for medications, and a compliance folder — before I've spoken to a single service user."

— Care manager, 24-bed supported-living provider

40%

MANAGER TIME ON ADMIN

165K+

UNFILLED CARE VACANCIES

30%+

ANNUAL STAFF TURNOVER

One connected system replaces five fragmented tools

Rota & Scheduling

AI-powered rota planner with min safe staffing, 11-hour rest enforcement, drag-and-drop, agency integration

Medication (eMAR)

Full digital MAR: chart grid, PRN tracking, stock management, daily counts, audit trail

Daily Care Notes

Voice-to-text input, AI structuring, mood analysis, safeguarding flags, care plan updates

Compliance

Automated evidence packs (KLOE), CQC readiness scoring from live data, gap analysis

Team Communication

Real-time chat with presence, read receipts, channels, file sharing

AI Intelligence

5 domain-specific agents, event-driven cross-module insights, predictive analytics

Built and deployed. Not a concept. Not a prototype.

£2.4 billion market growing at 27% CAGR

UK Care Management Solutions

£891M 2024

£2.4B 2030 projected

Why Now

- CQC Single Assessment Framework requires continuous evidence
- People at the Heart of Care mandates digital records
- Integrated Care Systems demand NHS-social care data sharing
- Agency costs rising — providers need internal optimisation

Target Customers

Small providers (1–3 locations)	~120,000
Medium providers (4–15 locations)	~25,000
Large providers (15+ locations)	~3,000
NHS trusts (discharge pathways)	~200

Regulatory Tailwinds

Three government mandates are creating mandatory demand for digital care platforms. Providers who don't adopt face increasing regulatory risk.

Simple, predictable SaaS pricing

Starter £99 /mo 1–3 locations, ≤25 staff ✓ Scheduling & daily notes ✓ Basic compliance ✓ Leave, incidents, training ✓ Team chat ✓ Email support	MOST POPULAR Professional £299 /mo 4–15 locations, unlimited staff ✓ Everything in Starter ✓ Full eMAR system ✓ AI daily notes ✓ CQC evidence packs ✓ Family portal ✓ Priority support	Enterprise £749 /mo 15+ locations, API access ✓ Everything in Professional ✓ API access ✓ Dedicated account manager ✓ SLA guarantee ✓ Custom AI prompts ✓ On-site training
 Fixed monthly fee No per-user charges. Predictable costs.	 93% gross margin Cloud + AI + email = £21/customer/month	 Month-to-month billing Annual plans available at 20% discount

Core insight: One system replaces five. Connected data across rota, medication, compliance, and notes — something no existing competitor offers.

Three-phase commercialisation

1

Phase 1: Direct Sales
Months 1–6

2

Phase 2: Channel
Months 6–12

3

Phase 3: NHS
Months 12–18

Phase 1: Direct Sales

- Target 20–50 providers in South East England
- Free 30-day trial → £99/mo Starter
- Cold outreach to CQC-registered providers
- LinkedIn marketing to care managers
- Conference presence (Care Show, NCF)

Target: 3 new customers/month

Phase 2: Channel Partnerships

- Care sector consultant partnerships
- CQC inspector relationships
- Payroll integration (ADP, Sage)
- Referral programme
- Local authority partnerships

Target: 8 new customers/month

Phase 3: NHS Integration

- NHS Digital partnership
- Discharge-to-assess pathways
- NHS procurement framework
- GP system integration
- Trust-level contracts

Target: 15 new customers/month

Built by someone who understands the problem

Opeyemi Olorunfemi

Founder & CEO

Full-stack engineer who built the entire MeticleCare platform — 41 modules, 484 endpoints, 78 pages — from scratch. Deep understanding of care sector operations, CQC requirements, and the practical challenges of getting care workers to adopt new technology.

Technical Capability

- ✓ TypeScript / React / Node.js

✓ AI/ML integration (OpenAI, Anthropic)

✓ Event-driven systems

✓ Socket.IO real-time
- ✓ PostgreSQL (raw SQL, no ORM)

✓ Multi-tenant architecture

✓ Docker / CI/CD

✓ Stripe billing

THE ASK

£200K–£350K

To convert a production-ready platform into a validated commercial product across UK supported living and domiciliary care.

The platform is live. We're ready to demonstrate.
